Summary

Teamwork, initiative, ability to learn and teach, customer and quality focus, effectiveness, broad range of experience. My greatest thrill is to learn a new technology, teach it to others, and use it to quickly develop reliable software that makes users more productive. While performing assigned tasks, I also make significant unsolicited contributions to the team. Improving the codebase and using best practices of doing things is also one of my passions. Also, I love contributing & sharing my knowledge to developer communities through blogging, micro-blogging on twitter/linkedin and other online/offline platforms.
